# 1. Global Header & Navigation Shell

The Navigation Shell wraps every page in the application.

## UI Elements & Controls

| Element                                     | Location                         | Purpose & Meaning                                                                                               | What Happens When Clicked                                                                                                                                                                                 |
|---------------------------------------------|----------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| T2T Logo & Brand Name                       | Top-left of header / Sidebar top | Identifies the official organization ( <i>Trash2Treasure Innovations LLP</i> ).                                 | Navigates directly back to <code>/dashboard</code> (for Admins) or <code>/my-work</code> (for Employees).                                                                                                 |
| Sidebar Menu Links                          | Left sidebar                     | Primary navigation menu for the 14 core modules.                                                                | Highlights the active page with green pill styling and smoothly switches routes.                                                                                                                          |
| Global Search Bar ( <code>Ctrl + K</code> ) | Header center                    | Instant command palette to find any Task (by title or ID like <code>T2T-1001</code> ), Project, or Team Member. | Opens the Command Palette modal overlay. Typing searches the database in real-time. Pressing <code>Enter</code> jumps directly to that project or task.                                                   |
| Notification Bell Icon                      | Header top-right                 | Alert center for task assignments, blocker notifications, and mentions.                                         | Opens a dropdown showing the 5 most recent unread alerts. Has a <code>"Mark all as read"</code> button and a link to <code>/notifications</code> .                                                        |
| User Profile Badge                          | Header top-right                 | Shows current logged-in user's initials (e.g. <code>VK</code> ), Full Name, and Role badge.                     | Opens the user profile menu with quick links to:<br>1. <i>My Profile / Settings</i> ( <code>/settings</code> )<br>2. <i>Sign Out</i> button (clears HttpOnly cookie and returns to <code>/login</code> ). |

## 2. Authentication: Login & Forced Password Change

---

### 2.1 Login Page ( `/login` )

**Purpose:** Secure single-entry portal for all company personnel. Eliminates demo buttons to enforce strict production credential validation.

- **Email or Employee ID Field:**
  - Accepts either your corporate email ( `vishnu@trash2treasure.com` ) **OR** your sequential Employee ID ( `T2T-001` ).
- **Password Field:**
  - Masked input with a reveal toggle eye icon to check typed characters.
- **"Sign In to Workspace" Button:**
  - Sends a secure `POST /api/auth/login` request.
  - Verifies credentials against Bcrypt hashes in the database.
  - Issues an encrypted HttpOnly JWT cookie ( `t2t_session_token` ).
  - Automatically redirects Super Admin/Executives to `/dashboard` and Employees/Interns to `/my-work` .

### 2.2 Forced Password Change ( `/change-password` )

**Purpose:** Protects newly provisioned accounts so only the employee knows their permanent password.

- **Trigger:** If `mustChangePassword === true` (automatically set when an Admin creates a new user), the system blocks access to all dashboard pages until this form is completed.
  - **New Password & Confirm Password Fields:**
    - Validates that the password meets security requirements (min 8 characters) and matches.
  - **"Activate Account & Save Password" Button:**
    - Hashes the new password, updates the user record, sets `mustChangePassword = false` , and immediately logs the user into their workspace.
-

### 3. Page 1: Executive Dashboard ( /dashboard )

**Purpose:** Executive mission-control for Super Admin (CEO), COO, and Department Heads. Aggregates company performance, active sprint momentum, blocked items, and urgent risks in real-time.

#### Every Card & Section Explained

1. Top KPI Summary Cards (4 Cards):

- **Total Team Members:** Live headcount. *Clicking takes you to /users .*
- **Active Projects:** Total projects with status ACTIVE . *Clicking takes you to /projects .*
- **Tasks In Progress:** Total workload currently being executed across all sprints. *Clicking takes you to /kanban .*
- **Overdue & Blocked:** Tasks past their deadline or flagged with an obstacle. Rendered in rose/red to alert leadership. *Clicking filters /tasks for urgent resolution.*

2. Active Sprint Health Widget:

- **Committed Points:** Story points promised for the current 2-week cycle (e.g. 45 pts ).
- **Completed Points:** Points delivered so far (e.g. 31 pts ).
- **Remaining Days:** Countdown to sprint review.
- **Progress Bar:** Visual execution velocity percentage.

3. Dynamic Organization Health Score (0 - 100):

- **Algorithm:**
  - Base score = 100 .
  - Deducts points for open blockers (5 pts per blocker).
  - Deducts points for overdue tasks (3 pts per overdue task).
  - Adds points proportionally for completed sprint velocity.
- **Status Badges:** EXCELLENT (85-100), HEALTHY (70-84), NEEDS ATTENTION (<70).

4. Immediate Action Center (Urgent Blocker Escalations):

- Lists tasks where an employee clicked "Flag Blocker".
- Shows: Task ID, Task Title, Assignee, and the **Blocker Reason** (e.g., "Waiting for vendor IoT firmware").
- **"Resolve / Inspect" Button:** Opens the task to contact the assignee, reassign the task, or log an unblock note.

5. Live Organizational Audit Feed:

- Real-time stream of what is happening inside T2T right now (e.g., "Aarav Patel moved T2T-1004 to IN\_REVIEW").

## 4. Page 2: 3-Stage Work Overview ( /work-overview )

**Purpose:** Answers the three most fundamental stakeholder questions without digging through spreadsheets:

- 1. *What did we complete?* (Past)
- 2. *What are we working on right now?* (Current)
- 3. *What are we building next?* (Future)

### The 3 Columns Explained

| 1. PAST WORK             | 2. CURRENT WORK       | 3. FUTURE WORK      |
|--------------------------|-----------------------|---------------------|
| (Completed Deliverables) | (In-Flight Execution) | (Roadmap & Next Up) |

#### 1. Past Work (Completed Deliverables):

- Lists tasks with status **COMPLETED**.
- Displays: Task code, title, project name, delivered story points, and completion date.
- **"View Milestone" Button:** Shows which project milestone this deliverable unlocked.

#### 2. Current Work (Active Initiatives):

- Lists all tasks in **IN\_PROGRESS** or **IN\_REVIEW**.
- Shows: Assignee avatar, priority pill ( **URGENT** , **HIGH** ), and days remaining until due date.
- Highlights any task that has a raised blocker in red background.

#### 3. Future Work (Strategic Roadmap & Upcoming):

- Lists tasks in **TODDO** or **BACKLOG** scheduled for upcoming sprint cycles.
- Shows: Planned story points, target start date, and required skills.

## 5. Page 3: Personal Workspace — "My Work" ( /my-work )

---

**Purpose:** The daily home page for Employees, Developers, and Interns. Filters out company-wide noise to focus strictly on: "What must I deliver today?" and "What have I accomplished?"

### Header Banner

- Shows the employee's Monogram Avatar, Full Name, Designation, Department, and Employee ID (e.g., T2T-007 ).

### Interactive Quick Stat Counters (Clickable)

- Completed Badge (Green):** Shows total tasks you've finished. **Clicking it switches directly to the "Work History & Delivered" tab.**
- In Progress Badge (Sky Blue):** Shows tasks you are actively working on. **Clicking it switches to the "Active Workspace" tab.**
- To Do Badge (Amber):** Shows tasks waiting in your personal queue.

### Overdue Alert Banner (Conditional)

- Appears only if you have tasks whose `dueDate < today` .
- Warns you to either finish the task, update the deadline, or flag a blocker.

### The Two Tabs Explained

#### Tab A: "Active Workspace"

Shows 3 organized task lists:

##### 1. Currently In Progress:

- Tasks you are currently developing or executing.
- Button 1: "Flag Blocker" (Rose Button):**
  - Opens the Blocker Dialog. Enter the reason you are stuck (e.g., "Need AWS S3 upload bucket permissions").
  - Clicking **"Confirm Blocker"** moves the task to `BLOCKED` , turns it red, and alerts Super Admin on the Executive Dashboard.
- Button 2: "Submit Review" (Purple Button):**
  - Moves task status to `IN_REVIEW` . Notifies tech leads or managers that work is ready for code review or QA verification.
- Button 3: "Complete" (Emerald Button with Checkmark):**
  - Instantly marks the task `COMPLETED` . Updates sprint burn-down and moves the card to your Work History.

##### 2. Tasks Blocked (If Any):

- Shows any tasks currently paused due to dependencies.
- Shows the blocker reason clearly in a tinted box.
- Button: "Unblock & Resume Work" (Green Button):**
  - Clears the blocker text, resets status back to `IN_PROGRESS` , and resumes active tracking.

##### 3. Next In Queue (To Do):

- Tasks assigned to you that haven't been started yet.
- Shows: Task ID, Title, Project, Story points, and Due Date.
- **Button: "Start Working" (Green Play Icon):**
  - Moves the task from **TODO** to **IN\_PROGRESS** with one click. Automatically sets the current start timestamp.

## Tab B: "Work History & Delivered Work"

Your permanent record of delivered value at T2T:

### 1. Metrics Header:

- **Delivered Work:** Total completed tasks count.
- **Story Points Shipped:** Total points delivered (e.g. **24 pts** ).
- **Effort Contributed:** Total logged hours (e.g. **42 hrs** ).

2. **Search Bar:** Instant real-time search across your completed deliverables by task title or task ID.

3. **Project Filter Dropdown:** Filter your history by a specific project (e.g., *Smart Waste Bin IoT*).

### 4. Deliverable Cards:

- Displays: Title, task ID code, **COMPLETED** green badge, project name, sprint name, points, and completion date.
  - **Button 1: "Inspect Details" (Gray File Button):**
    - Opens the **Deliverable Inspection Modal**.
    - Displays full requirements scope, original description, estimated vs. actual effort hours, and full discussion/comment log.
  - **Button 2: "Reopen" (Amber Rotate Button):**
    - If a task requires rework or QA found an issue, clicking **Reopen** moves it back to **IN\_PROGRESS** .
-

## 6. Page 4: Drag-and-Drop Agile Kanban Board ( /kanban )

**Purpose:** Visual workflow management representing sprint tasks moving through production stages.

### The 6 Pipeline Columns

| Column      | Stage Definition                                                   |
|-------------|--------------------------------------------------------------------|
| BACKLOG     | Requirements gathered, waiting to be scheduled into a sprint.      |
| TODO        | Committed to the current sprint; ready for an engineer to pick up. |
| IN_PROGRESS | Active engineering, testing, or operational execution.             |
| IN_REVIEW   | Pull Request open, QA verification, or manager review.             |
| BLOCKED     | Work halted due to an external impediment or missing resource.     |
| COMPLETED   | Done, tested, delivered, and accepted.                             |

### Interactive Actions

- **Drag-and-Drop:** Grab any task card by holding the mouse and drop it into another column.
  - Automatically triggers `PATCH /api/tasks/[id]` .
  - Saves the new status in SQLite/PostgreSQL with optimistic UI (updates instantly without flickering).
- **Filter Toolbar:**
  - **Project Filter:** View Kanban for all projects or a single initiative.
  - **Sprint Filter:** Switch between active sprint and future sprints.
  - **Assignee Filter:** Filter cards assigned to a specific team member.
  - **Priority Filter:** View only `URGENT` or `HIGH` cards.

## 7. Page 5: Task Management Hub ( /tasks )

---

**Purpose:** Enterprise-grade master table for querying, sorting, creating, and inspecting all organization tasks.

### Controls & Buttons

- **Search Input:** Live filter across task titles, descriptions, and IDs ( T2T-1001 ).
  - **Status & Priority Dropdowns:** Narrow down tasks by execution state or urgency.
  - **Button: "+ Create Task" (Super Admin & Managers):**
    - Opens the **Create Task Modal:**
      - **Title & Description:** Detailed requirements or acceptance criteria.
      - **Project & Sprint:** Link task to an existing project and sprint.
      - **Assignee:** Assign to an employee or intern.
      - **Priority:** LOW , MEDIUM , HIGH , or URGENT .
      - **Story Points:** Select Fibonacci points ( 1, 2, 3, 5, 8, 13 ).
      - **Estimated Hours:** Expected time commitment (e.g. 12 hrs ).
    - **Auto Task ID:** Automatically generates the next sequential ID (e.g. T2T-1020 ).
  - **Task Table Columns:**
    - Task ID, Title, Project, Assignee Avatar, Priority Badge, Status Badge, Due Date, and Actions.
  - **Task Detail & Discussion Modal (Clicking any Task):**
    - View full task metadata.
    - **Live Discussion Box:** Write a comment or status update and click "Post Comment".
    - Comments are date-stamped and show the author's avatar.
-

## 8. Page 6: Agile Sprint Hub & Backlog Planning ( /agile )

---

**Purpose:** For Scrum Masters, CTO, COO, and Super Admin to plan 2-week iterations, manage backlog velocity, and conduct retrospectives.

### Controls & Sections

- **Active Sprint Overview:**
    - Sprint Goal, Start Date, End Date, Committed Points vs Completed Points.
  - **Button: "+ Plan New Sprint":**
    - Opens modal to define Sprint Name (e.g., *Sprint 4 - Battery Pack Enclosure*), date ranges, and overarching goal.
  - **Backlog Grooming List:**
    - Drag or assign unassigned backlog tasks into the newly created sprint.
  - **Sprint Retrospective Section:**
    - Record team feedback at the end of each cycle:
      - *What went well?*
      - *What went wrong / bottlenecks?*
      - *Action items for next sprint.*
-

## 9. Page 7: Projects Portfolio & Detail View ( /projects )

---

**Purpose:** Comprehensive directory of company initiatives (e.g., *Smart Waste Segregation IoT*, *Material Recovery Logistics*, *Circular Marketplace*).

### Controls & Cards

- **Project Cards:**
    - Displays Project Code (e.g. T2T-PRJ-01 ), Title, Status Badge ( ACTIVE , PLANNING , COMPLETED ), Assigned Manager, Budget, and **Progress Bar (% completed based on finished tasks)**.
  - **Button: "+ Create Project" (Admin Only):**
    - Form: Project Title, Code, Description, Manager, Budget, Start/End Dates.
  - **Project Detail Page ( /projects/[id] ):**
    - **Tab 1: Overview & Milestones:** Phase checklist with progress checkboxes.
    - **Tab 2: Team Roster:** All developers and leads assigned to this project.
    - **Tab 3: Linked Sprints:** All sprints executing deliverables for this project.
    - **Tab 4: Documents:** Specifications, CAD files, and architecture diagrams.
-

## 10. Page 8: Team Performance & Workload Capacity ( /performance )

---

**Purpose:** Promotes healthy, balanced team productivity by monitoring workload capacity without toxic stack rankings.

### Indicators & Metrics

- **Workload Capacity States:**
    -  **BALANCED** : Contributor has 1-4 active tasks (sustainable flow).
    -  **ELEVATED** : Contributor has 5-7 active tasks (approaching capacity).
    -  **CAPACITY WARNING** : Contributor has 8+ active tasks or multiple overdue deadlines (prompts manager to reassign tasks).
  - **Contribution Matrix Table:**
    - Member Name, Role, Department, Active Tasks, Completed Tasks, Story Points Delivered, and Logged Hours.
  - **Department Filter Dropdown:** Filter performance metrics by Tech, Operations, Marketing, or Finance.
-

## 11. Page 9: Operational Analytics ( /analytics )

---

**Purpose:** Visual business intelligence for executive decision-making.

### Charts & Graphs (Powered by Recharts)

1. **Sprint Velocity Chart (Bar Chart):**
    - Compares **Planned Story Points** vs. **Delivered Story Points** across historical sprints.
  2. **Task Status Distribution (Donut / Pie Chart):**
    - Visual percentage split between `TODO` , `IN_PROGRESS` , `IN_REVIEW` , `BLOCKED` , and `COMPLETED` .
  3. **Team Workload Allocation (Horizontal Bar Chart):**
    - Displays task distribution across team members to identify underutilized or overburdened staff.
  4. **Department Output Velocity:**
    - Measures delivery throughput by department (Engineering vs Logistics vs Marketing).
-

## 12. Page 10: Operations Calendar ( /calendar )

---

**Purpose:** Master schedule synchronizing company deadlines, project milestones, and sprint cycles.

### Controls & Views

- **View Selectors:** Switch between **Month**, **Week**, and **Day** views.
  - **Calendar Grid:**
    - Task due dates appear as colored pills (Urgent = Red, High = Amber, Normal = Blue).
    - Sprint milestones appear as green highlight bands.
  - **Interactive Click:** Clicking any calendar pill opens the task details modal for immediate review.
-

## 13. Page 11: Team Members Hub ( /users )

**Purpose:** Super Admin exclusive administrative dashboard for employee lifecycle and access control.

### Controls & Actions

- **Button: "+ Provision Member" (Green Button Top-Right):**
  - Form to onboard a new employee or intern:
    - Corporate Email ( `name@trash2treasure.co.in` ).
    - Full Name.
    - Role ( `EMPLOYEE` , `INTERN` , `COO` , `CTO` , `CFO` , `CMO` , `CAO` , `SUPER_ADMIN` ).
    - Department & Designation.
    - Temporary Password (defaults to `T2T@Password2026!` ).
  - Automatically assigns the next sequential Employee ID: `T2T-001` , `T2T-002` , `T2T-013` ...
  - Flags account with `mustChangePassword = true` .
- **Member Table Columns:**
  - **Avatar:** Monogram initials circle ( `VK` , `SN` ) or logo.
  - **Name & Email:** User details.
  - **Employee ID:** Universal code ( `T2T-xxx` ).
  - **Role Badge:** Color-coded role indicator.
  - **Status Badge:** `ACTIVE` (Green), `INACTIVE` (Gray), `SUSPENDED` (Red).
- **Actions Menu per Member:**
  - **"Edit Details":** Reassign department, designation, or reporting manager.
  - **"Toggle Status":** Suspend or deactivate an account with one click (instantly terminates their active sessions).

## 14. Page 12: Compliance Audit Logs ( /audit-logs )

---

**Purpose:** Immutable compliance ledger for tracking every critical action taken across the company.

**Table Columns**

- **Timestamp:** Date and exact time of the action (in Asia/Kolkata time).
  - **Actor / User:** Full name, avatar, and role of the person who took the action.
  - **Action Type:**
    - USER\_LOGIN : Session authenticated.
    - TASK\_CREATED : New task added to system.
    - TASK\_STATUS\_CHANGED : Task moved across Kanban or completed.
    - BLOCKER\_FLAGGED : Blocker raised.
    - PASSWORD\_CHANGED : Security credential updated.
  - **Object:** Target project, task ID, or user modified.
  - **Details:** Specific payload changes (e.g. *Changed status from TODO to IN\_PROGRESS*).
-

## 15. Page 13: Company Document Vault ( /documents )

---

**Purpose:** Central knowledge base and document repository for company intellectual property.

### Controls & Vault Folders

- **Categories:**
    -  **Technical Specs:** Circuit schematics, IoT firmware documentation, API specs.
    -  **Client & Vendor Contracts:** Circular economy partner agreements and vendor contracts.
    -  **Research & Whitepapers:** Plastic pyrolysis research, material recovery feasibility studies.
    -  **Proposals & Grants:** Government grant applications and investor decks.
  - **Button: "+ Upload Document":**
    - Upload file (PDF, DOCX, ZIP, PNG) directly stored in Supabase Cloud Storage ( `t2t-assets` bucket).
    - Assign confidentiality tier: `COMPANY_WIDE` , `MANAGEMENT_ONLY` , or `CONFIDENTIAL` .
-

## 16. Page 14: Announcements Broadcast ( /announcements )

---

**Purpose:** Company-wide notice board for leadership broadcasts.

### Controls & Cards

- **Announcement Cards:**
    - Shows Title, Content, Published Date, and Author (e.g. *Vishnu (CEO)*).
    - Priority Badge: **NORMAL** , **IMPORTANT** , or **CRITICAL** .
  - **Pinned Announcements:** Critical announcements pin to the top of everyone's dashboard until acknowledged.
  - **Button: "+ Post Announcement" (Super Admin & Executives Only):**
    - Form to draft an announcement, attach a priority flag, and broadcast immediately to all team members.
-

## 17. Page 15: Organization & Account Settings ( /settings )

---

**Purpose:** System configuration and personal credential management.

### Sections & Buttons

#### 1. Organization Profile (Super Admin Only):

- **Company Legal Name:** Trash2Treasure Innovations LLP
- **Tagline:** Internal Operations & Agile Work Management
- **Official Email:** info@trash2treasure.co.in
- **Headquarters Location:** Registered corporate office address.
- **Button: "Save Organization Profile":** Commits updates to database.

#### 2. Operational Schedule Settings:

- Standard working days (Monday - Friday / Saturday).
- Standard Sprint Cycle Duration (Default: 2 weeks).
- Default Timezone ( Asia/Kolkata ).

#### 3. Personal Account Security (All Users):

- Update your personal password. Requires entering current password and new password twice.
  - **Button: "Update Password":** Securely hashes new password with Bcrypt and saves.
-

## Quick Reference: Actions by Role

| Task                           | Super Admin (CEO)               | Employee / Intern            |
|--------------------------------|---------------------------------|------------------------------|
| Log into platform              | Email or T2T-001 + password     | Email or T2T-xxx + password  |
| View Organization Health       | /dashboard (KPIs, health score) | Not available                |
| Check today's assignments      | /my-work or /dashboard          | /my-work → Active Workspace  |
| Start working on a task        | /my-work or /kanban             | /my-work → "Start Working"   |
| Report a blocker               | /tasks                          | /my-work → "Flag Blocker"    |
| Submit task for review         | /tasks                          | /my-work → "Submit Review"   |
| Mark task complete             | /my-work or /kanban             | /my-work → "Complete"        |
| View my completed deliverables | /my-work & /work-overview       | /my-work → "Work History"    |
| Inspect past deliverable scope | /tasks or /my-work              | /my-work → "Inspect Details" |
| Reopen a past task             | /tasks or /my-work              | /my-work → "Reopen"          |
| Move card on Kanban            | Drag & drop on /kanban          | Drag & drop on /kanban       |
| Onboard a new team member      | /users → "+ Provision Member"   | Not available (Restricted)   |
| Deactivate/Suspend an account  | /users → Toggle Status          | Not available (Restricted)   |
| Create a Project or Sprint     | /projects & /agile              | View-only                    |
| Inspect Audit Ledger           | /audit-logs                     | Not available (Restricted)   |
| Change personal password       | /settings                       | /settings                    |
