18. 3.1 First-Time Login & Security Password Setup
19. 3.2 The "My Work" Command Center (</my-work>)
20. 3.3 Raising Blockers & Requesting Leadership Support
21. 3.4 Inspecting Past Work History & Shipped Deliverables
22. 3.5 Collaborating on Tasks, Task Comments, & Discussions

23. 3.6 Using the Kanban Board & Calendar
24. Quick Reference Cheat Sheet

1. Platform Architecture & Role-Based Access Control (RBAC)

The T2T platform enforces a **Zero-Trust Role-Based Authorization** model with 8 pre-configured roles:

Role	Access Level	Primary Responsibilities
SUPER_ADMIN / CEO	Unrestricted Global Access	Complete control over company settings, user provisioning, role adjustments, project budgets, and audit logs.
COO	Operations Oversight	Manages circular economy operations, logistics routes, sprint health, and delivery timelines.
CTO	Engineering & Technology	Manages IoT sensors, firmware architectures, software developers, and cloud infrastructures.
CFO	Financial Oversight	Monitors project financial allocations, resource cost utilization, and procurement.
CMO	Growth & Brand Strategy	Manages corporate partnerships, branding initiatives, and public disclosures.
CAO	Advisory Council (Read-Only)	High-level regulatory, ESG, and operational governance oversight without data mutation permissions.
EMPLOYEE	Contributor Workspace	Daily execution, personal task updates, blocker flagging, discussion comments, and deliverable tracking.
INTERN	Scoped Contributor	Scoped assignments, skill development, and task deliverable submissions.

2. SUPER ADMIN GUIDE

As Super Admin (

Vishnu (CEO)

), you have global visibility and authority across the entire company.

2.1 Executive Dashboard (`/dashboard`)

The command center for day-to-day organizational pulse.

- **Top KPI Cards:**
- **Total Team Members:** Shows active headcount across engineering, operations, finance, and advisory.

- **Active Projects:** Current live initiatives in progress (e.g., Smart Waste Bins, MRF Routing).
 - **Tasks in Execution:** Total tasks in `IN_PROGRESS` or `IN_REVIEW`.
 - **Overdue & Blocked:** High-priority alert counter indicating tasks past deadline or blocked by external dependencies.
 - **Active Sprint Health Widget:**
 - Displays currently running sprint name, dates, committed story points, and burn-down percentage.
 - **Dynamic Organizational Health Score:**
 - Calculated out of `100` dynamically based on completed story points, unresolved blocker penalties, and overdue task ratios.
 - **Immediate Action Center:**
 - Directly highlights flagged blockers raised by developers or operations leads requiring executive intervention.
 - **Live Audit Feed:**
 - Real-time immutable record of system events (user logins, status updates, task reassignments).
-

2.2 3-Stage Work Overview (`/work-overview`)

Answers three critical leadership questions in real-time:

1. **Past Work (Shipped Deliverables):**
 - 2. Historical record of completed tasks, archived projects, and past sprints with exact completion dates and effort delivered.
 3. **Current Work (In-Flight Execution):**
 - 4. Real-time view of active tasks, assignees, deadlines, and active blockers.
 5. **Future Work (Strategic Roadmap):**
 - 6. Upcoming scheduled initiatives, future sprint backlogs, and milestone roadmap items.
-

2.3 Company Team & Personnel Hub (`/users`)

Super Admin exclusive directory for workforce governance:

- **Add New Member (`+ Provision Member`):**
 - Provide Full Name, Corporate Email (`name@trash2treasure.co.in`), Role, Department, and Designation.
 - The system automatically generates a sequential Employee ID (`T2T-001` , `T2T-002` , ..., `T2T-013`).
 - Set a Temporary Password. The `mustChangePassword` security flag is automatically set to `true` to force a private password change upon their first login.
- **Member Management Table:**

- Displays Monogram/Logo Avatars, Employee IDs, Department, Role Badges, and Account Status (**ACTIVE** , **INACTIVE** , **SUSPENDED**).
 - **Edit Member Modal:**
 - Reassign reporting managers, update designations, or change account status.
 - **Quick Status Toggle:**
 - One-click account deactivation/suspension with immediate session revocation.
-

2.4 Project Management Portfolio (`/projects`)

- **Project Cards:**
 - Real-time progress bars (**0% - 100%**), assigned Project Manager, budget status, and milestone completion percentages.
 - **Project Detail View (`/projects/[id]`):**
 - **Milestones Checklist:** Mark project phases as completed.
 - **Assigned Team:** Personnel roster allocated to the project.
 - **Linked Sprints:** Sprints associated with project milestones.
 - **Project Documents:** Technical specifications, proposals, and contracts.
-

2.5 Agile Sprint Hub & Backlog Planning (`/agile`)

- **Product Backlog:**
 - Unscheduled user stories and tasks waiting for grooming.
 - **Create New Sprint:**
 - Set Sprint Name (e.g. **Sprint 4 - IoT Edge Deployment**), Target Start/End Dates, and Strategic Sprint Goals.
 - **Sprint Commitment:**
 - Assign backlog tasks into the active sprint with story points and estimated effort hours.
 - **Sprint Retrospective Recorder:**
 - Log retrospective findings (What went well, what can improve, action items).
-

2.6 Enterprise Task Management Hub (`/tasks`)

- **Data Table Controls:**
- Filter by Status (**TODO** , **IN_PROGRESS** , **IN_REVIEW** , **BLOCKED** , **COMPLETED**), Priority (**URGENT** , **HIGH** , **MEDIUM** , **LOW**), Assignee, and Project.
- **Create Task (`+ Create Task`):**

- Form fields: Title, Description, Priority, Assignee, Project, Sprint, Story Points (1, 2, 3, 5, 8, 13), and Estimated Hours.
 - Generates official sequential task code (e.g. T2T-1019).
 - **Task Inspection Modal:**
 - Full scope inspection, deadline dates, and live comment thread for updates.
-

2.7 Persistent Drag-and-Drop Kanban Board (`/kanban`)

- **6 Column Pipeline:** BACKLOG ? TODO ? IN_PROGRESS ? IN_REVIEW ? BLOCKED ? COMPLETED .
 - **Drag-and-Drop Interaction:**
 - Grab any card and drop it into another column.
 - Automatically issues an authenticated API request and persists to the database with zero page reloads.
 - **Filter Bar:**
 - Filter board by Project, Sprint, Assignee, or Priority.
-

2.8 Operational Analytics & Velocity Intelligence (`/analytics`)

Interactive visual dashboards powered by Recharts:

- **Sprint Velocity:** Planned vs. Completed story points across sprint cycles.
 - **Task Status Distribution:** Visual breakdown of total workload stages.
 - **Member Allocation:** Workload per contributor to prevent resource bottlenecks.
 - **Department Throughput:** Output comparison between Engineering, Logistics, and Ops.
-

2.9 Member Performance & Workload Balancing (`/performance`)

Constructive health monitoring to optimize team balance without toxic stack rankings:

- **Workload Capacity States:**
 - BALANCED : Sustainable task load.
 - ELEVATED : High active commitments.
 - CAPACITY WARNING : Overcommitted; prompts manager intervention to reassign work.
 - **Contribution History:** Completed tasks, delivered points, and logged hours per person.
-

2.10 Master Operations Calendar (`/calendar`)

- Consolidates task deadlines, sprint milestones, and project targets into Month, Week, and Day views.

- Color-coded by priority and department.
-

2.11 Compliance Audit Trail (`/audit-logs`)

- Complete immutable compliance ledger recording every platform action:
 - Timestamp, User Actor, Action Verb (`USER_LOGIN` , `TASK_CREATED` , `STATUS_CHANGED`), Object Title, and Metadata.
-

2.12 Company Document Vault (`/documents`)

- Central repository for organizational IP:
 - Technical Specifications, Client Contracts, Research Papers, and Financial Summaries.
 - Filterable by project and confidentiality tier.
-

2.13 Official Announcements Broadcast (`/announcements`)

- Broadcast critical updates across the entire company:
 - Pinned announcement banners, priority tags (`URGENT` , `INFO`), and author stamps.
-

2.14 Organization & Platform Settings (`/settings`)

- **Company Branding & Info:**
 - Company Legal Name: `Trash2Treasure Innovations LLP`
 - Tagline, Official Contact Email (`info@trash2treasure.co.in`), and Headquarters.
 - **Operational Working Hours:**
 - Business schedule, standard sprint cycle duration (2 weeks), and default timezone (`Asia/Kolkata`).
 - **Security & Password Policy:**
 - Update personal password with confirmation checks.
-

3. EMPLOYEE & INTERN GUIDE

As a Team Member or Intern, the platform is streamlined to help you focus on your daily deliverables without administrative noise.

3.1 First-Time Login & Security Password Setup

1. Open <https://t2t-workflow.vercel.app/login>.

2. Enter your corporate email or Employee ID (e.g. `T2T-007`) and temporary password provided by the Super Admin.
 3. **Forced Password Reset Screen:**
 4. The platform will automatically redirect you to `/change-password` .
 5. Choose a secure personal password and confirm.
 6. Upon saving, your account is activated and you are taken to your personalized workspace.
-

3.2 The "My Work" Command Center (`/my-work`)

Answers your fundamental question: *"What do I need to deliver today?"*

- **Top Quick Stat Counters:**
 - **Completed:** Total tasks you have finished. *Clicking this badge immediately switches to your Work History.*
 - **In Progress:** Tasks you are currently working on. *Clicking switches to the Active Workspace.*
 - **To Do:** Tasks queued for you.
 - **Overdue Alert Banner:**
 - Prominently warns you if any task has passed its due date so you can prioritize it or raise a blocker.
 - **Two Tab Workspaces:**
 - **Active Workspace:**
 - **Currently In Progress:** Tasks in flight with 3 one-click action buttons:
 - `Flag Blocker` : Opens dialog to report a problem.
 - `Submit Review` : Moves task to `IN_REVIEW` for tech lead inspection.
 - `Complete` : Marks deliverable finished.
 - **Tasks Blocked:** Tasks waiting on dependencies. Includes an `Unblock & Resume Work` button.
 - **Next in Queue (To Do):** Tasks assigned to you. Click `Start Working` to transition it immediately into `IN_PROGRESS` .
 - **Work History & Delivered Work:**
 - Complete track record of everything you have delivered at T2T.
-

3.3 Raising Blockers & Requesting Leadership Support

If you are stuck (e.g. waiting for API credentials, hardware delivery delayed, awaiting approvals):

1. On your in-progress task card, click **"Flag Blocker"**.
2. Enter a clear explanation of what is impeding your progress.
3. Click **"Confirm Blocker & Notify Team"**.

4. The task transitions to **BLOCKED**, highlights in red, and alerts leadership in the Executive Action Center.
5. Once resolved, click **"Unblock & Resume Work"** to continue.

3.4 Inspecting Past Work History & Shipped Deliverables

1. On **/my-work**, click the **"Work History & Delivered"** tab (or click the top **Completed** counter).
2. **Metrics Header:** Shows your total completed tasks, total story points shipped, and effort hours contributed.
3. **Live Search & Project Filter:**
4. Search by Task Title or Task ID (e.g. **T2T-1001**).
5. Filter by specific project.
6. **"Inspect Details" Button:**
7. Opens the past deliverable modal showing the full task description, requirements, completion timestamp, and comment history.
8. **"Reopen" Button:**
9. If leadership requests revisions on a completed task, click **Reopen** to move it back to **IN_PROGRESS**.

3.5 Collaborating on Tasks, Task Comments, & Discussions

1. On **/tasks** or from any task card, click the task title or comment counter.
2. In the modal, view the discussion timeline.
3. Add updates, notes, technical links, or questions in the comment box.
4. Every comment is permanently recorded and visible to collaborators and project managers.

3.6 Using the Kanban Board & Calendar

- **Kanban (/kanban):**
 - View where your tasks sit within the broader sprint pipeline.
 - Drag your task card from **TODO** ? **IN_PROGRESS** ? **IN_REVIEW** ? **COMPLETED** .
- **Calendar (/calendar):**
 - Inspect your upcoming task deadlines and team sprint milestones.
- **Documents (/documents):**
 - Download project technical specifications and design guidelines.

4. Quick Reference Cheat Sheet

Action	Super Admin Path	Employee / Intern Path
Check Organization Health	<code>/dashboard</code> & <code>/work-overview</code>	N/A (Admin only)
Check What to Work on Today	<code>/my-work</code> or <code>/dashboard</code>	<code>/my-work</code> ? Active Workspace
Review Completed Work History	<code>/work-overview</code> & <code>/my-work</code>	<code>/my-work</code> ? Work History Tab
Move Tasks Across Pipeline	<code>/kanban</code> or <code>/tasks</code>	<code>/kanban</code> or <code>/my-work</code>
Report a Blocker	<code>/my-work</code> & <code>/tasks</code>	<code>/my-work</code> ? "Flag Blocker"
Inspect Past Deliverables	<code>/work-overview</code> or <code>/tasks</code>	<code>/my-work</code> ? "Inspect Details"
Provision / Onboard Users	<code>/users</code> ? " + Provision Member"	N/A (Admin only)
Create Projects & Sprints	<code>/projects</code> & <code>/agile</code>	View-only
View Audit Logs	<code>/audit-logs</code>	N/A (Admin only)
Change Personal Password	<code>/settings</code>	<code>/settings</code>
